Let's Start!

What is the issue, exactly?

Learning Outcome

Exchange advice and suggestions in communicative situations.

Ask your partner:

- How often do you go to the pharmacy?
- Do you ever ask the pharmacist for advice?

Can Do Statements

- I can describe sickness and health problems.
- I can give advice.
- I can ask for help.

Let's Explore!

Sally visits the pharmacy. What does she ask the **pharmacist***?

* A "pharmacist" works in a pharmacy and gives advice about medications and treatments.

Instructions: Read the text aloud.

Pharmacist: Hello. How may I help you?

Sally: Hi. Can you show me which pain medication I should use?

Pharmacist: OK, what is the issue, exactly?

Sally: I've injured my back. I have intense pain and stiffness. I've tried a heat pack and a cold pack, neither of which worked. I'm having a lot of trouble walking.

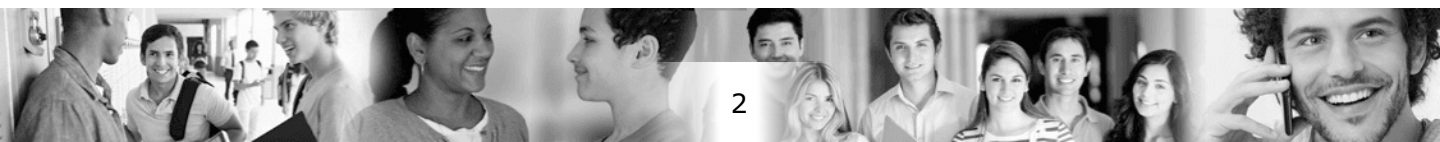

Pharmacist: OK, sounds like you may have a slipped disk. There isn't much you can do to heal it. If I were you, I'd take this medication twice a day. It's a muscle relaxant and anti-inflammatory. It should help with the pain. Let me show you what dosage you need. Here, on the package. I wouldn't take more than the recommended dose if you don't want to feel worse. It is strong medication.

Sally: OK, so that's it? Just take this and lie down?

Pharmacist: Unfortunately, that's all you can do. If it doesn't get better soon, you should go to the doctor.

Sally: OK, thanks. One last thing. Can you tell me where I can find a tensor bandage? It's for a friend who sprained her thumb.

Pharmacist: Of course, right over here.

Let's Practice!

I need some help, please!

Instructions: Read the sentences. Select the correct answer.

1. _____ me which pain medication I should use?
 - a. Can show
 - b. Can I show
 - c. Can you show
2. _____ you what dosage you need.
 - a. Let me showing
 - b. Let me show
 - c. Let you show
3. Can you _____ I can find a tensor bandage?
 - a. tell me wear
 - b. tell me where
 - c. tells me where
4. Could you _____ to use the bandage?
 - a. tell me way
 - b. tell you how
 - c. tell me how
5. Let me _____ to put it.
 - a. show me where
 - b. show you where
 - c. show you place

Let's Practice!

What do you think I should do?

Instructions: Proofread the sentence. Cross out the wrong words. Write the sentences correctly.

1. If it doesn't get better soon, you should to go to the doctor.

2. I wouldn't taking more than the recommended dose if you don't want to feel worse.

3. If I were you, I'd to take this medication twice a day.

4. You ought to using this tensor bandage.

5. You'd better reading the package carefully.

Extension Activity

Write a dialogue!

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Imagine you are at the pharmacy.
- Write a dialogue between you and the pharmacist.
- Create a health problem and ask the pharmacist for help.
- Practice your dialogue with your partner.

Self-Assessment

Yes No

I write about health a problem.

☐ ☐

I talk about health care.

☐ ☐

I ask for help with my health problem.

☐ ☐

Target Words

- **heat pack** (noun): something warm to put on your skin over an area with muscle pain
e.g. I've tried a heat pack and a cold pack.
- **stiffness** (noun): difficulty moving muscles
e.g. I have intense pain and stiffness.
- **muscle relaxant** (noun): a medication that helps to relax muscles
e.g. This is a muscle relaxant.
- **anti-inflammatory** (noun): a medication that helps to reduce inflammation
e.g. I need an anti-inflammatory.
- **slipped disk** (noun): when the cartilage (disk) has moved out of its usual place
e.g. Sounds like you have a slipped disk.
- **tensor bandage** (noun): a tight bandage wrapped around a swollen part of the body
e.g. Can you tell me where I can find a tensor bandage?
- **to sprain** (verb): to twist the ligaments of an ankle or wrist causing swelling and pain
e.g. The tensor bandage is for a friend who sprained her thumb.

Learning Points

Asking for Help

You can use the modal verbs **can** or **could** to ask for help. **Could** is more polite than **can**.

The structure is:

Can/Could + you + show/tell+ me+ Question word (who, what, where, when, why, which, how)

Can/Could	you	show/tell	me	Question word
Could	you	tell	me	what dosage I need?
Can	you	show	me	how to use this?
Could	you	show	me	where I can find a tensor bandage?
Can	you	tell	me	which pain medication I should use?

When you want to offer help, or when someone offers help, you can use the structure:
Let me show/tell + you + question word

Let me show you what dosage you need.

Let me show you where it is.

Let me tell you what you should do.

Learning Points

Giving Advice

You use the modals *should*, *ought to*, and *had better* to give advice. You can also use the second conditional.

Should is the most common modal used to give advice.
Ought to and *had better* are used for giving strong advice.

Subject	Modal	Main Verb	
You	should	get	some help for the pain.
You	ought to	take	these and lie down right away.
You	had better not	drive	while taking this medication.
I	would	go	to the doctor if it doesn't get better soon.

In conversation, it is common to use contractions with *had better*:
You'd better not step on the line.

You can use the second conditional to give advice. This sounds more friendly and conversational. It is common to use the condition
If I were you, ...

Examples:

- *If I were you, I'd take this medication twice a day.*
- *If it doesn't get better soon, you should go to the doctor.*
- *I wouldn't take more than the recommended dose if you don't want to feel worse.*
